

Comprehensive SharePoint Lifecycle Management

From start to finish, we take care of every phase of your MOSS lifecycle. We build MOSS, customize it, keep it running at top speed and manage version upgrades. So relax, forget about the complexities of MOSS and get back to business.

1: Infrastructure

Increase profitability by avoiding large capital outlays for expensive data centers, servers and support staff.

Rapid deployment gets you to market now with immediate ROI. Our SLAs guarantee uptime and on-demand 24/7 access to SharePoint experts. Easily scale or upgrade to meet high availability, disaster recovery or regulatory and compliance needs.

2: Application Development

MOSS runs well out-of-the-box, but it will dance when customized. Our expert development team will analyze, design and deliver a real-world SharePoint solution using leading-edge techniques.

Our eclectic array of development talent will professionally handle your user interface, web parts and workflow to keep the project **on time and under budget.**

3: Managed Services

Let us maintain your MOSS server farm, so you can do what you do best. Leave it to the MOSS experts to keep your SharePoint servers secure and reliable with services like **TotalCare™, SecureCare™ & EncryptoCare™.**

Don't waste time troubleshooting, patching, monitoring and backing up MOSS. Free up your group to focus on core business projects, resulting in increased profitability with a faster ROI.
