SECURITY

Serious SharePoint security.

Fpweb.net data centers employ an aggressive security strategy, taking cyber security as seriously as physical security.

We feature SSAE 16 SOC I Type II Certified Data Centers that use biometric security access and even armed guards.

All networks boast redundant Cisco Intrusion Detection and Prevention systems.

Fpweb.net is compliant ready for SOX, PCI and HIPAA SharePoint environments.

In addition, we offer many data backup and disaster recovery options to fit your Business Continuity Plan and ensure your data is completely secure.

100%

RELIABILITY

SharePoint business continuity.

Fpweb.net's high availability is backed by our 100% uptime Service Level Agreement guarantee and powered by Fpweb.net's SuperFast Network.

Fpweb.net is the trusted advisor for building reliable and dependable SharePoint infrastructure based on best practices and experience hosting hundreds of enterprise farms.

Our servers are fully redundant and backed up by five diesel generators. Additionally, Fpweb.net provides disaster recovery options to meet your Recovery Point Objective (RPO) and Recovery Time Objective (RTO) leaving you prepared for anything.

PERFORMANCE

Built for SharePoint speed.

Fpweb.net has designed our data centers and network to perform for you! Based on your requirements, Fpweb.net architects a SharePoint infrastructure that will perform beyond your expectations.

Building a public website? Content Delivery Networks (CDNs) and your Fpweb.net SharePoint cloud utilize static content caching and page load times to boost performance worldwide.

The heart of SharePoint is SQL Server. Your SQL is designed and built by dedicated database administrators who employ storage best practices and the latest performance tuning techniques.

EXPERTISE

Our talent on your team.

Fpweb.net's world class SharePoint support is available 24/7/365.

For the last decade, our Microsoft Certified Engineers have built and supported countless SharePoint farms while diligently supporting customers as a trusted SharePoint advisor.

We handle all your SharePoint questions and even recommend appropriate software or integrators to help you build a solution.

Our unparalleled SharePoint expertise extends to navigating complicated licensing, using either your licensing or our own to maximize your ROI.

We handle your SharePoint so you can handle your business.

FLEXIBILITY

It's customizable SharePoint.

Flexibility means full parity SharePoint, 100% customizable, even down to the billing terms.

Our unique SharePoint hosting allows you on-premise style control in the cloud! With full server access, you control licensing, integrations and scalability.

Achieve Active Directory integration, secure VPN and single sign on with other systems through your authentication method of choice.

With the elasticity to scale up or down quickly and easily, your Fpweb.net SharePoint Cloud environment grows with your needs.
